

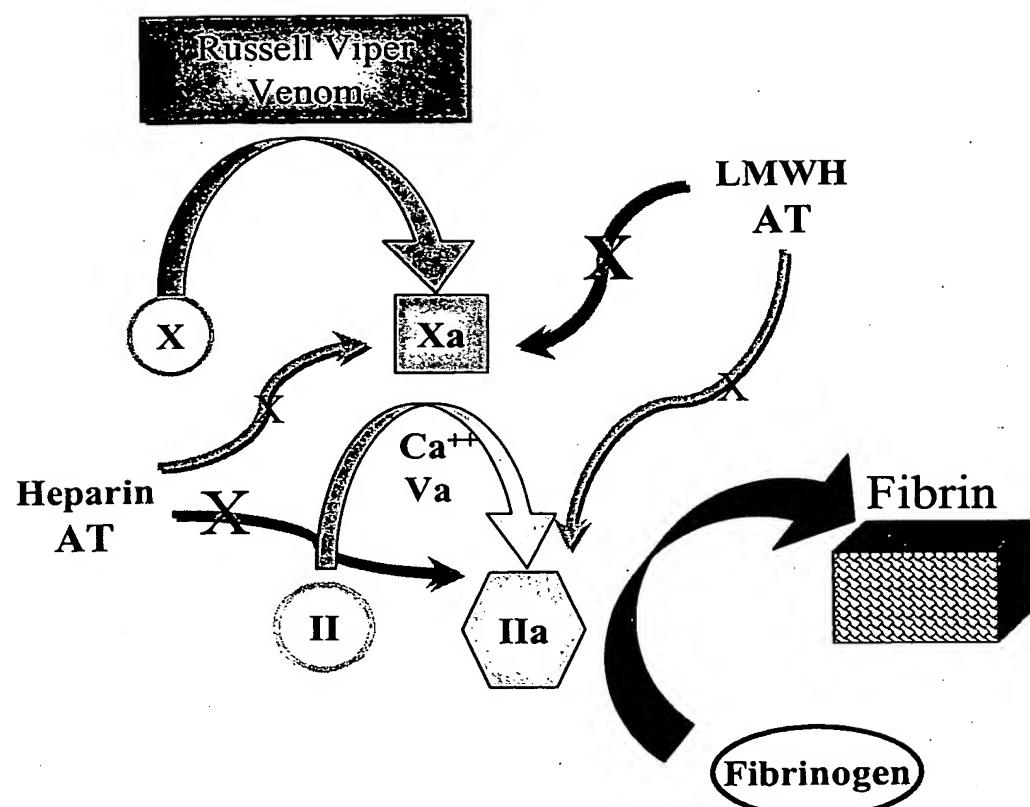

Figure 1

In Vitro Response of the Whole Blood Low Molecular Weight Heparin (LMWH) Test to Enoxaparin In Citrated Whole Blood - Mean of Ten Individuals

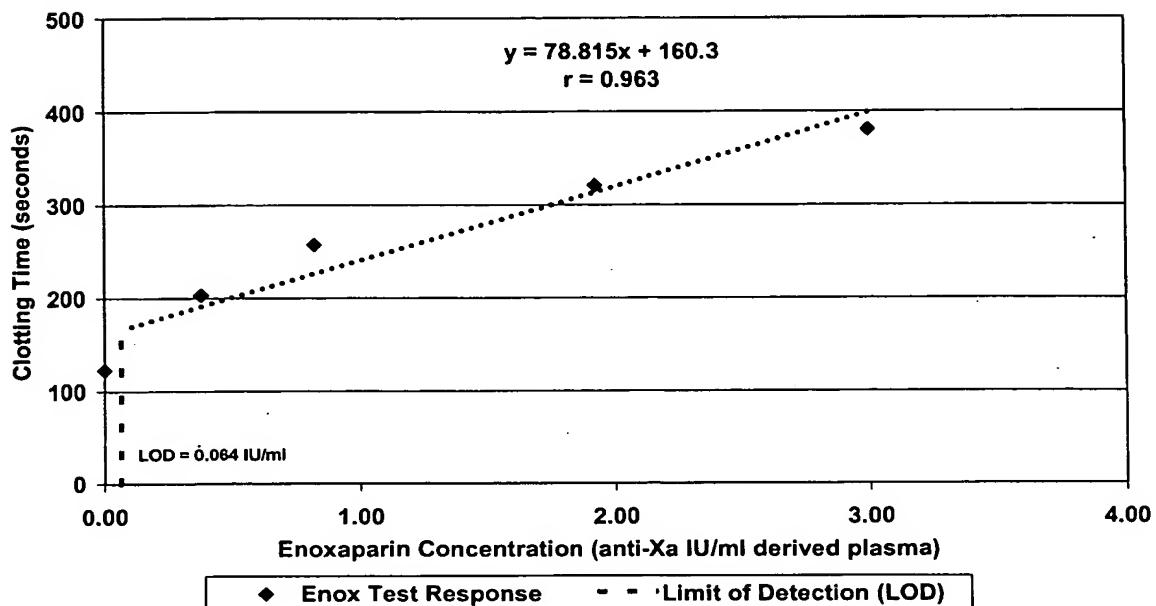

FIG. 2

Response of The Whole Blood Low Molecular Weight Heparin (LMWH) Test to Various Low Molecular Weight Heparins (LMWH) in Citrated Whole Blood

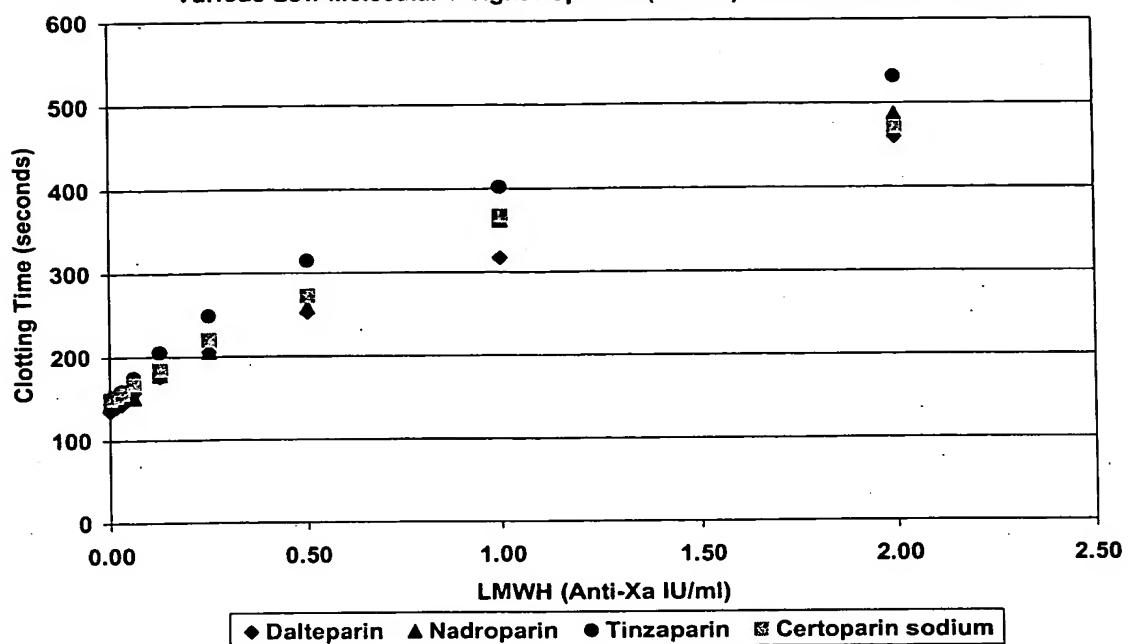

FIG. 3

**Whole Blood Low Molecular Weight Heparin (LMWH) Test Clotting
Time versus Time of Sample Aquisition**

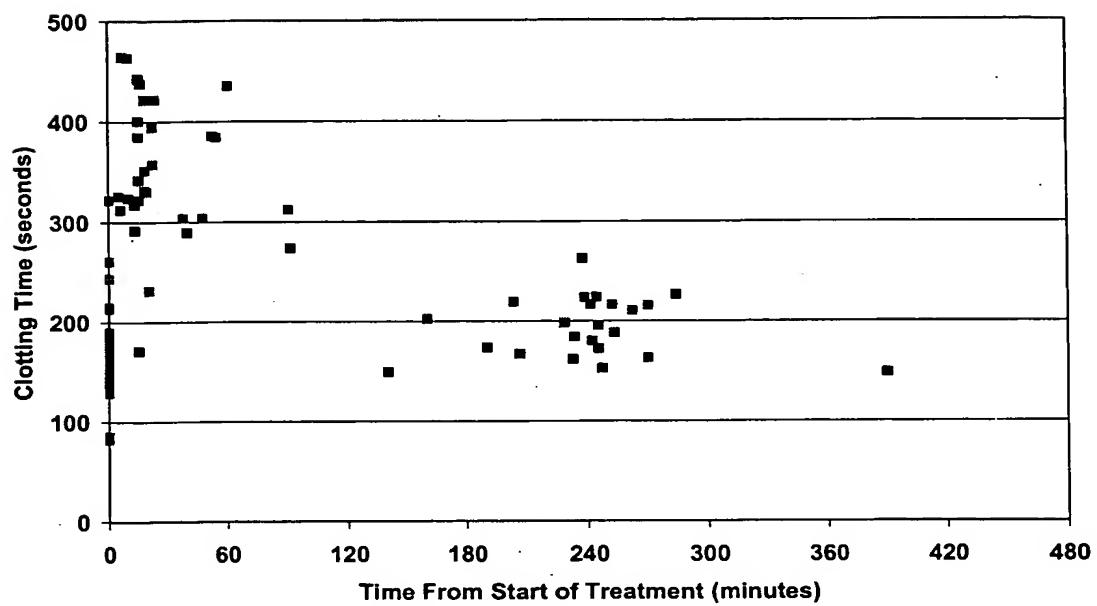

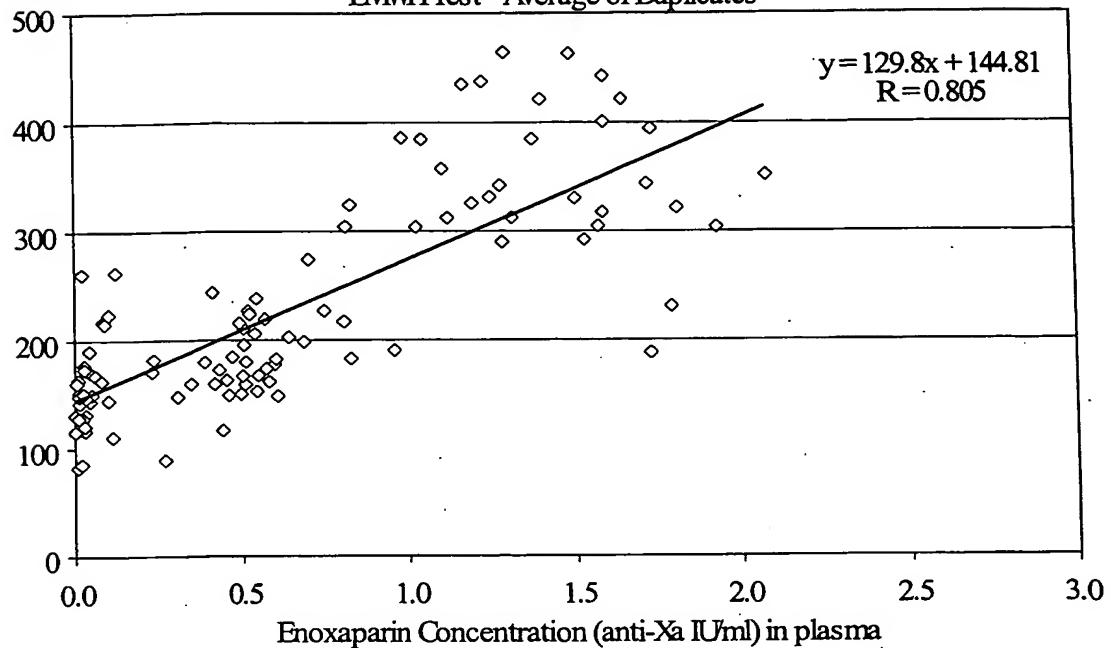

FIG. 4

Fig. 5: Correlation of the Rapidpoint®Coag Enoxaparin Test to the STACHROM
LMWH Test - Average of Duplicates

Factor X Level Effects on Whole Blood Low Molecular Weight Heparin (LMWH)
Test - % Difference from 100% Normal Value - in Plasma
